FIG. 82 is a flowchart illustrating a process for managing user profiles and preferences. The process begins at a start node, leading to a 'Request Profile' step. This step leads to a 'User Profile' data store. From the 'User Profile', the process proceeds to a decision diamond labeled 'What Attributes Can User Access?'. If the answer is 'Yes', the process continues to a 'Display Preferences Available For Edit' step. If the answer is 'No', the process proceeds to an 'Update Another' decision diamond. The 'Update Another' diamond has a 'Yes' path that loops back to the 'Request Profile' step and a 'No' path that leads to an 'End' node. From the 'Display Preferences Available For Edit' step, the process leads to a 'Display Preference Options' step. From here, the user can 'Select Preference', which leads to an 'Application Changes Preference' step, or 'User Selects Cancel', which leads back to the 'Display Preferences Available For Edit' step. The 'Application Changes Preference' step leads to an 'Update Profile' step, which updates the 'User Profile' data store.
